Alexandra Buga

Alexandra Buga is a polymer clay creator residing in Drama, Greece. She has an academic background in Linguistics and Art Therapy, but her interest in art, design and folklore, as well as her sheer love for texture and color, led her to the creative path. She launched her jewelry brand BLACK TROPICANA in 2018 and her newfound hobby became a full-time occupation.

Mixing with a darker color prepare three different shades of blue.

Run each shade of blue through the extruder and then cover them gently with a thin sheet of white. You can reduce some rolls to make different sizes.

Squeeze the rolls creating a cane. Here, I cut the cane into 3 pieces and merged them together.

Slice the cane making thin sheets and cut the desirable shapes for your jewelry.

Bake the polymer clay according to the manufacturer. Sand and assemble the pieces. Voila! You have ready to wear earrings.

LC SLICER & LC MINI SLICER

LC Slicer is the best slicer for polymer clay for creating perfect thin and clean cuts - slices of polymer clay. It is an indispensable tool for the Mokume Gane (Hidden Magic) technique and for everyone, who wants to get thin slices of polymer canes without distortion.

LC Minislicer is a compact, yet a very practical slicer for polymer clay. Due to its compact size, you can take it with you to workshops and enjoy precise cutting without distortion.
