GLITTERING EARRINGS

Using Mica powders on polymer clay you can create amazing effects. Let's make some earrings with glittering textures. It is easy with LC Stencils by Lucy Clay.

Watch video tutorial on [Youtube](#).

Materials & Tools:

- Polymer clay (white)
- [LC Machine](#), Roller
- [LC Stencils](#) set 3
- Mica powders for polymer clay (pearl and green)
- Small brush
- Cookie cutter
- Scalpel, blade
- Sandpaper
- Mini-drill
- 4 jump rings and earring hooks

Kája Koutová

Kája has been exploring art ever since she could hold a pencil. The love for art, architecture and photography has led her to Pilsen's Secondary school of Civil Engineering, where she's currently studying. There, she developed a passion for the Science and Math behind materials, something that she wants to pursue in the future. Only recently did she delve into polymer clays after starting work at Lucy Clay in 2020.

Condition polymer clay. Prepare sheet (about 2 mm thick) of polymer clay in white color. Place an LC Stencil on the sheet and gently roll over with an acrylic roller.

Apply green and pearl mica powders and carefully remove the LC Stencil.

Cut the desired shape using a cookie cutter. Bake in the oven according to the manufacturer's instructions.

If necessary, sand the edges and backside. You can also use UV resin to make earring more shiny.

Drill a hole for hanging.

Assemble the earrings using jump rings and earring hooks.

These earrings were made using [LC Microstencils](#).

LC STENCILS

Stencils for easy making of wonderful patterns from polymer clay using paints, inks, and powders.
They are available in many versions so you can select patterns you like.

Size 80 x 85 mm

Pattern size 70 x 70 mm (2 $\frac{3}{4}$ " x 2 $\frac{3}{4}$ ")
