## FAUX LEATHER BRACELET

Make these faux leather bracelets and learn how to make brown polymer clay look like leather.

Watch a video tutorial on [YouTube](#).

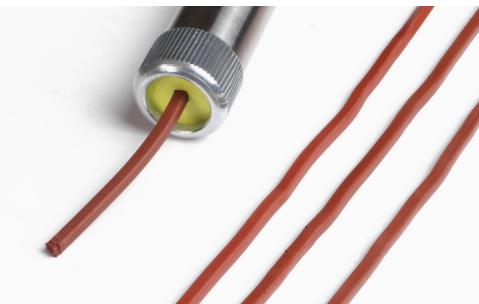

### Materials & Tools:

- Polymer clay (brown)
- [Machine](#)
- [Czextuder](#) + [LC Disk 14](#) (small square)
- Scalpel, blade
- Bracelet mold
- Black acrylic paint
- Fine steel wool
- Cord

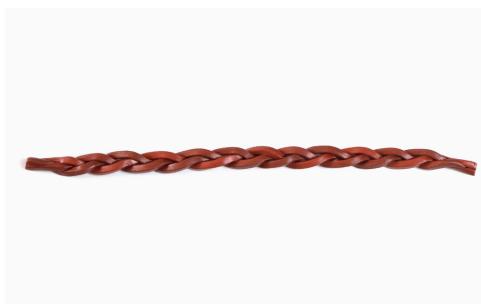

Condition polymer clay. I used two shades of brown clay.

Extrude the clay through the small square disc from LC Disk 14. You will need three extrusions.

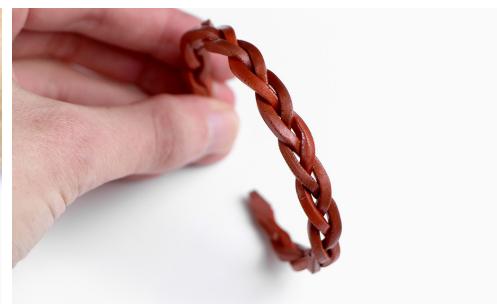

Start making a classic braid - cross the strands over the middle strand.

Stop when your braid is long enough. Cut off the excess clay. Slightly press the ends, the braid becomes narrow on both ends.

Place it on the mold and bake it according to the manufacturer's instructions.

Let it cool down and remove it from the mold.

Paint it black and let dry.

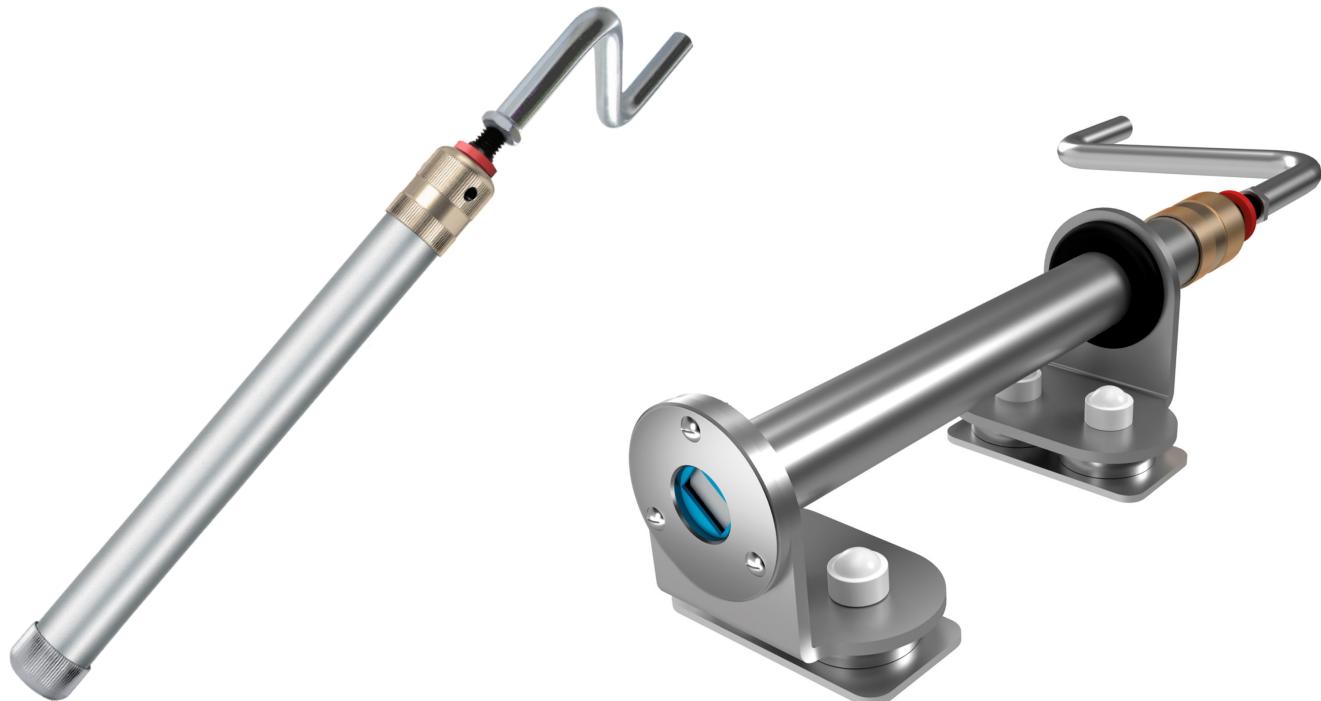

Rub it with fine steel wool. The bracelet is slightly bendable, so it is easy to put on.

I also added a sliding knot closure. This ensures the bracelet does not fall off while wearing.

# CZEXTRUDER

LC Czextruder is the most robust and reliable extruder on the market. It was designed by polymer clay artists in cooperation with engineers, that is why LC Czextruder is the best tool for extruding polymer clay. It offers easy and smooth extruding, robust and well-engineered construction, hand-free mode and a broad range of extensions for LC Czextruder - LC Disks. LC Czextruder will bring your polymer projects to a whole new level. Discover LC Czextruder and enjoy claying.
