Condition savanna polymer clay and make a thick sheet.

Use your template to cut a circle from the polymer clay sheet.

Press the heart cookie cutter down to stamp the pattern on the circle.

Place the circle gently into an oven-safe plate or bowl. Bake it according to the manufacturer's instructions.

Let it cool completely, then remove your dish from the mold. Sand the rim.

Use a small brush to paint the rim and the heart. Allow the paint to dry, and our polymer clay dish is ready for use.

LC MACHINE

LC Machine is a high-end pasta machine created for work with polymer clay. LC Machine was designed in cooperation with engineers and polymer clay artists. That is why LC Machine is handy and easy to use, and, at the same time, very efficient.
